

St. Matthew's Church of England Primary School
School and Eco Council Minutes

Date: 21.10

Classes Present:

BB LB IF IR 2B 2P 3AW 3BW 4K 4S 5C 5FB 6Q 6S

Lead teacher: Miss Zych

First thing we talked about: Monitoring turning off the lights and CO2 impact

The children are excited to cut more carbon in our school. We learnt that gas emission (particularly carbon dioxide) is dangerous because it contributes to global warming. We know that the warmer the Earth gets, the worse off we all are! Year 5 Rep said that she read in a scientific source that we need to act now and we all agreed. The heating and electricity production releases the most CO2 (carbon dioxide).

We need to have light monitors in each class and their job will be to make sure we turn off the lights when not in the classroom.

We made posters to display in the classroom to remind everyone about it.

Also on an agenda: Poster Competition

Miss Zych will launch it on Dojo just before half term so the children have enough time to research the topic and design the poster.

We agreed that the poster needs to be:

- 2d so we can photocopy the winning piece
- Show examples of classroom rubbish that can be put in blue bin
- Contain a clear message on what is not allowed in the blue bin

For next meeting:

Next meeting date: 27.11.2024
