

Recycling Centre Visit 30.03.23

The School Council and the Recycling Poster competition winners went to our local Recycling Centre on Portman's Walk to learn more about recycling and what are the rules of recycling.

We found out lots of things and explored all the containers with rubbish.

We learnt that nearly everything can be recycled at this centre:

- cooking oils
- books
- car batteries
- scrap metal
- TVs
- old bicycles
- glasses
- coffee pods
- mobile phones
- engine oil
- glass
- fridges and freezers and lots more

We learnt that nearly everything can be reused and we are aware that we should try and limit the amount of rubbish we produce at school and at home.

At school we limited the plastic we use during our lunches by removing the plastic cutlery in packed lunches. We also recycle plastic bags now (a big thank you to Mrs Bowen who takes care of this and takes the bags to the recycling centre for us).

The School Council would like you to think if you can recycle any of your rubbish next time you throw it away at home.
